

How many hens does it take to produce 4.86bn eggs??

Based on the current genetic pyramid for Lohmann, 1 male with 10 females will result in 4.86 billion eggs into the market.

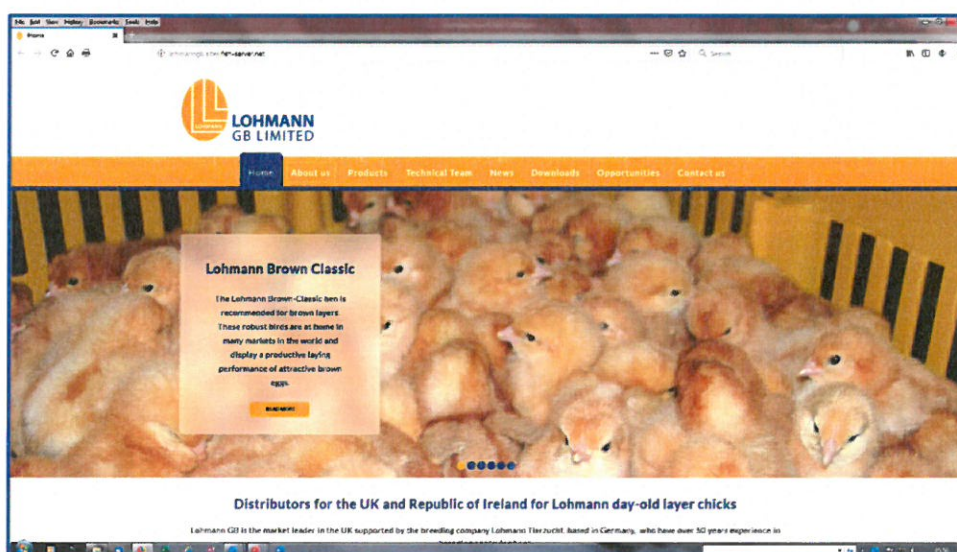

Put it another way 1 Lohmann Brown Male Pureline is the Great, Great, Great Grandfather to 4.86 billion children!

= 4.86 Billion Eggs!!

Work related Gifts.....

We all receive presents that relate to our jobs and this is probably more than common in the poultry industry; mugs with chickens, chicken ties etc. Imagine the delight of Adrian Marshall (TM South East) when he received a 'Giant Gummy Egg' from his Son and Daughter as a birthday present. His daughter proudly explained that 'it is an egg from one of your chickens Daddy!'. Adrian explained that he was very pleased with the present as he has a rather sweet tooth, but that it was divided up and shared with all the family. Sometimes receiving presents related to your job can have its benefits.
